I have been working as a web developer since 2021. Currently I am working as a web developer at PT. Kosada Group Indonesia.

I mostly work on new features internally, using lumen for the backend and vue.js for the frontend. Apart from working internally, I also handle external requests.

PROFESSIONAL EXPERIENCE

Web Developer

PT Kosada Group Indonesia (Barantum)
June 2022 - present

Skilled in website and database maintenance, server configuration for application requirements, SLA creation for CRM users, email integration with CRM, bug fixing, feature request generation, Vue 2 to Vue 3 migration, optimization of socket and query performance, and integration of Google reviews.

Junior Web Developer

PT Indah Logistik
August 2021 - June 2022

Contributed to the migration of a web application from PHP Native to Yii Framework, incorporating new features and menus. Managed website and database maintenance, and configured server requirements for optimal performance. Developed internal and partner-facing website applications using Yii framework.

IT Support

PT Indah Logistik
February 2021 - August

Contributed to adding new features and menus, while also managing website and database maintenance tasks.
